

Microbial diversity and biogeochemistry in glacier forefields: assessment of ecological stability in high alpine environments

Marco Meola, Anna Lazzaro, Josef Zeyer

Environmental Microbiology, Institute of Biogeochemistry and Pollutant Dynamics, ETH Zurich, CH-8092 Zurich, Switzerland

- No specific trend visible in soluble nutrients during the first sampling season
- Microbial community structure in untreated soils is resistant
- Microbial community structure in sterilized soils shows gradual resilience not yet stabilized after two sampling timepoints
