### CSEM Apps for Public: Japan Earthquake Early Warning

- An efficient & unique system (local systems in Mexico, Romania, Turkey)
- Best in high hazard countries
- Unlikely to be generalised in  ${}^{\bullet}$ the short term

P waves (precede S waves) N T MERICE T R S waves (destructive main tremors)

1. Seismometers detect P waves. the initial tremors, warning center,

2. This is transmitted to an early

3. Warnings are sent out to TV, radio, cellphones.

Sources: Japan Meteorological Agency, Times reporting

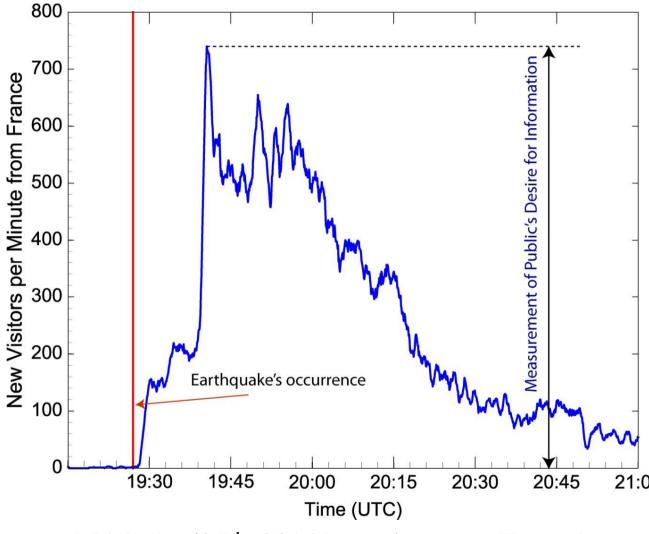

# Existing Apps: Reporting Earthquakes

- Report earthquakes
- Filters: Mag & loc.
- 37 000 to 40 000 earthquakes reported annually by EMSC
- Estimated number of felt & damaging quakes:
  - 2 000 to 4 000 a year

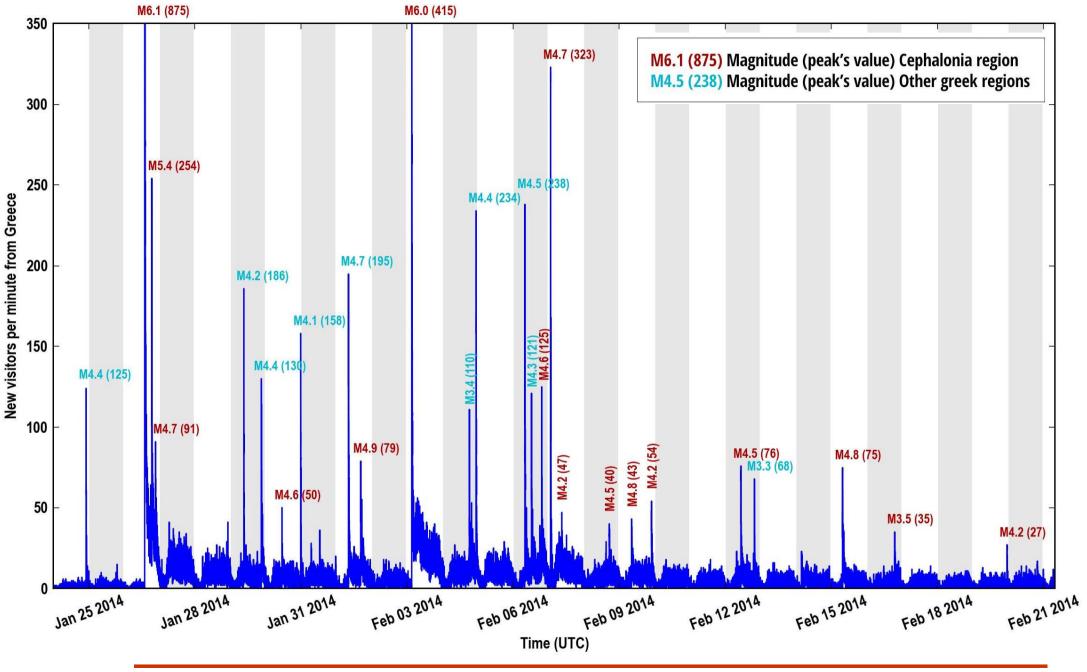

**Shaking is Key, not the Magnitude!** 

- Massive convergence of eyewitnesses on EMSC website
- Looking for information within tens of sec
- So fast that traffic used to locate M5.8 Virginia epicentre in 2 min with 30 km accuracy (Bossu et al., SRL, 2014)
- Flashsourcing method

M4.9, April 7<sup>th</sup>, 2014 Barcelonnette (France)

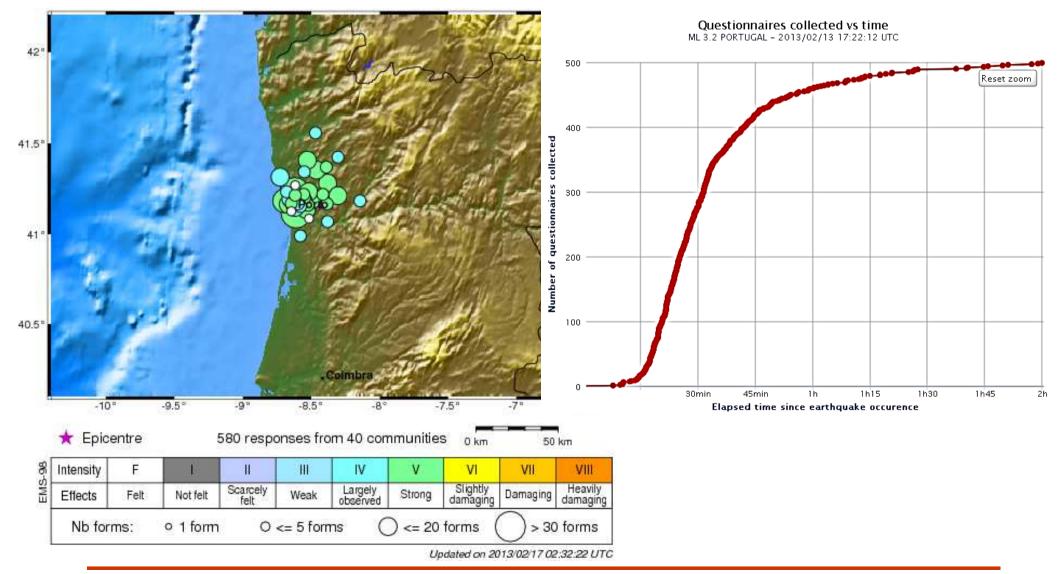

### EMSC web traffic related to the widely felt earthquakes in Greece - 2014-01-24 to 2014-02-18

EGU2014

### Стоwdsourced info: Questionnaires in 32 languages

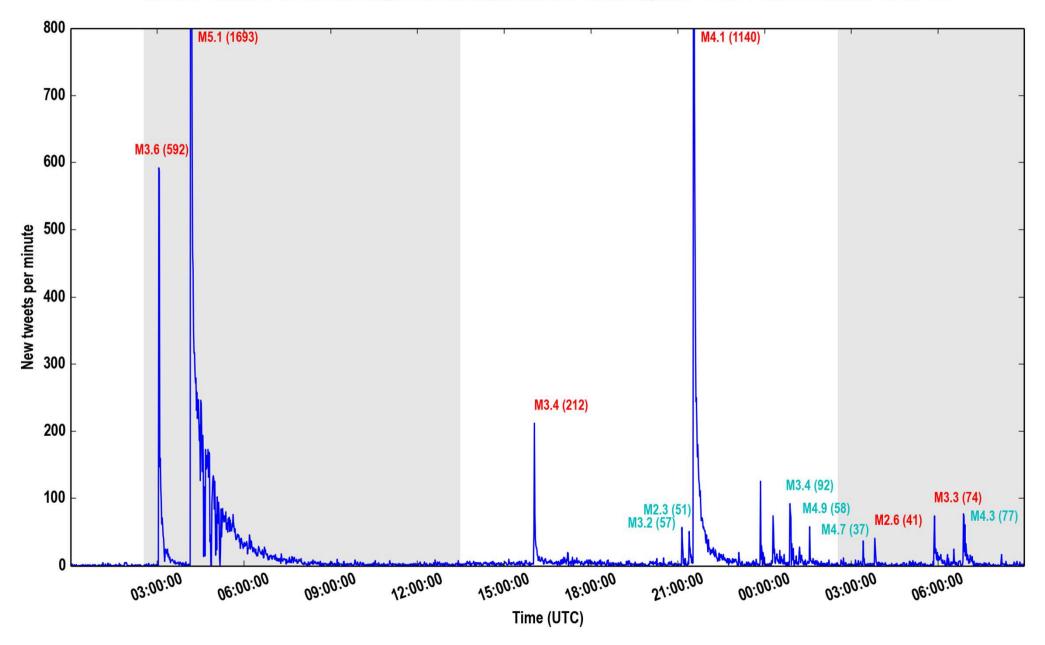

• M3.2 Feb. 13, 2013 Porto: Small in size but of local societal importance

EGU2014

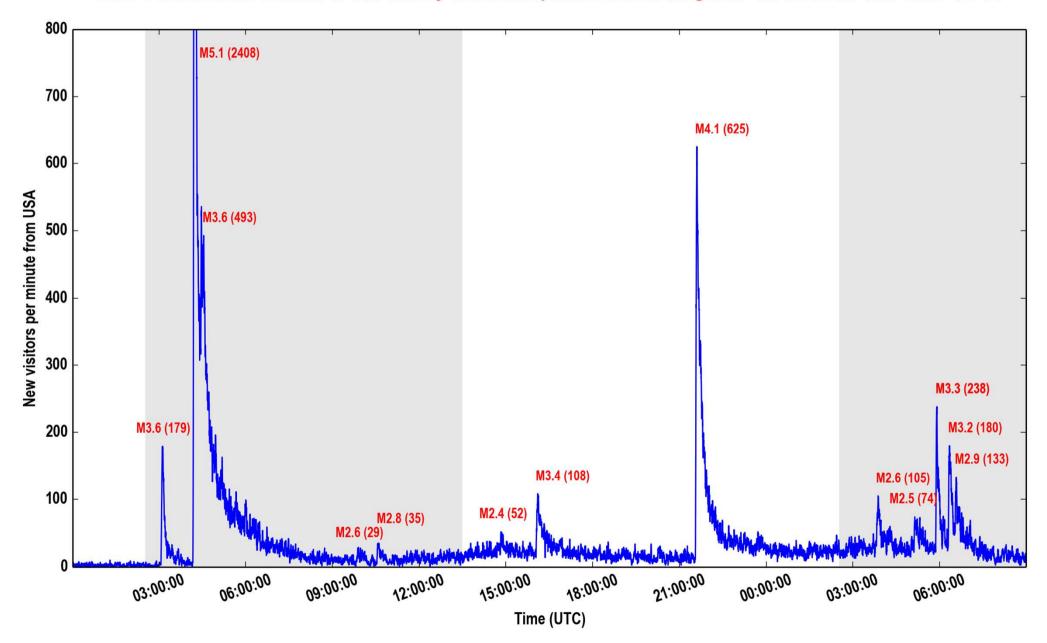

#### Tweets related to the widely felt earthquakes in Los Angeles - 2014-03-29 and 2014-03-30

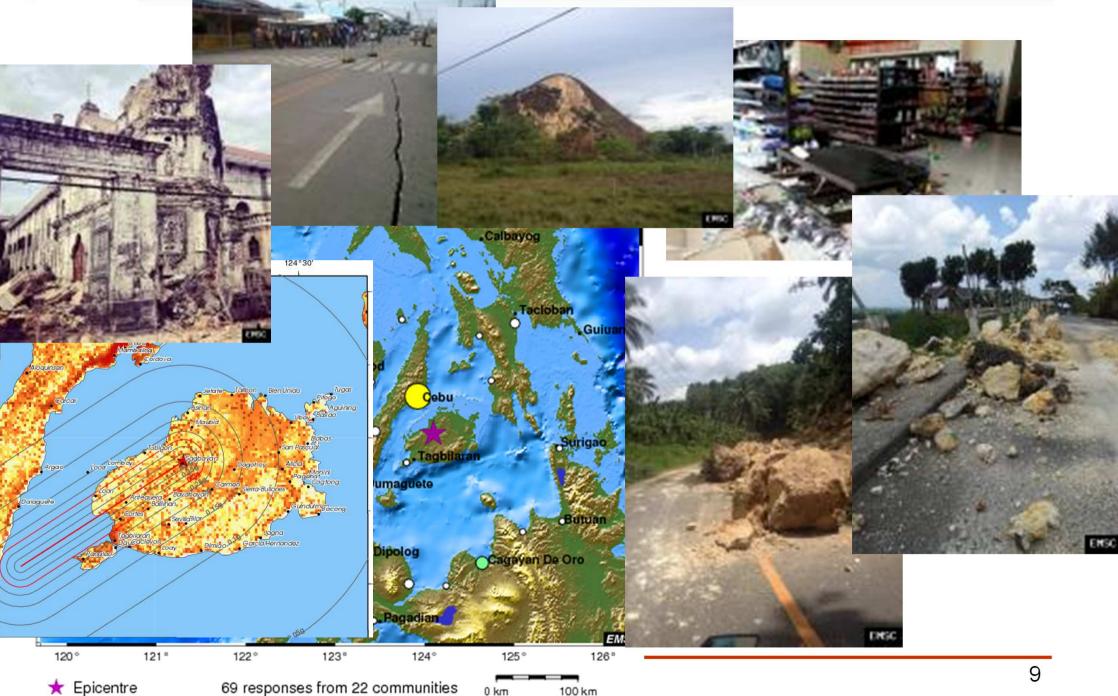

## **Complementarity Flashsourcing & TED**

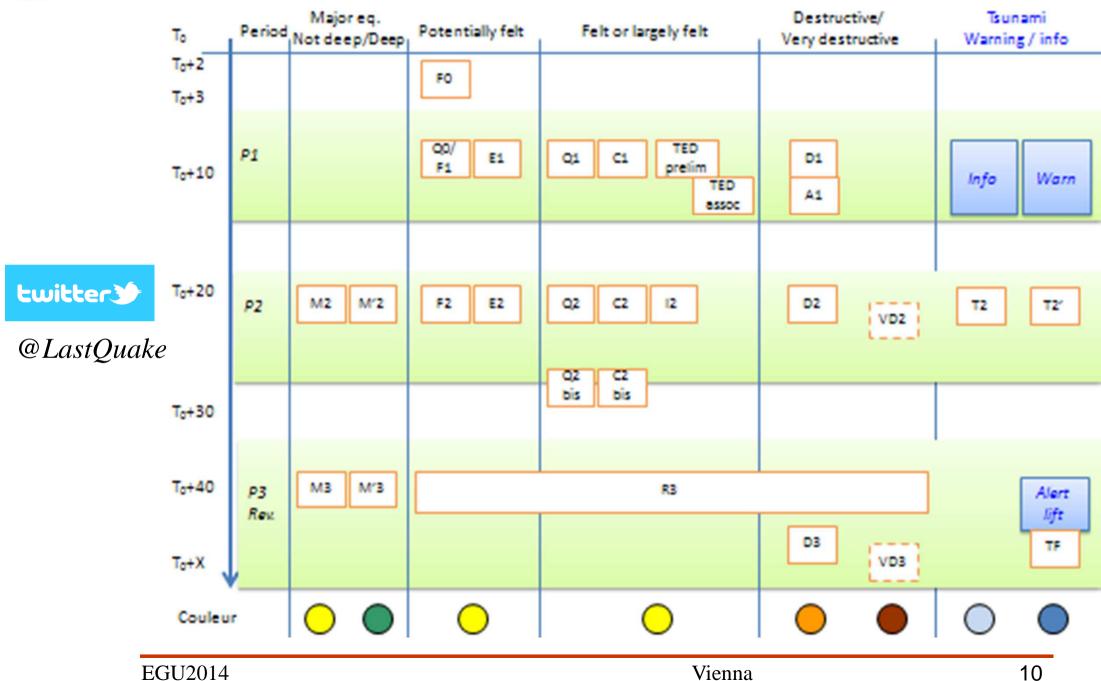

#### EMSC web traffic related to the widely felt earthquakes in Los Angeles - 2014-03-29 and 2014-03-30

# Emsc Philippines M7.1, Oct. 13 2013: EQIA & 27 pics

# **EXAMPLE** Discrimination of Significant Earthquakes

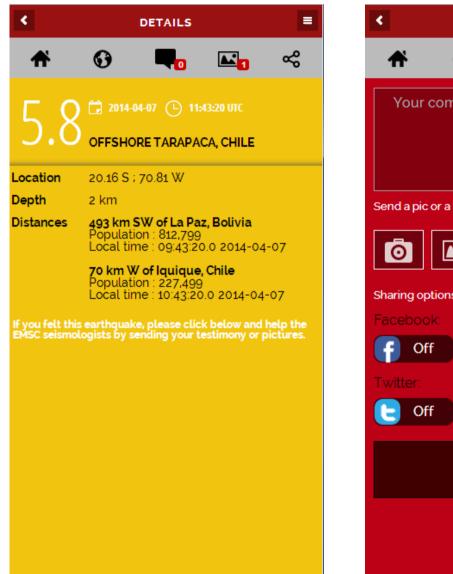

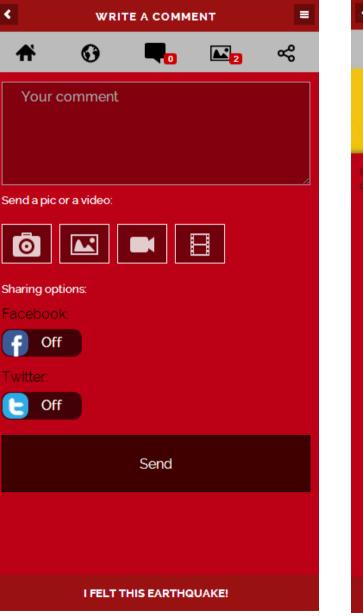

### **EXEM** The Application Itself

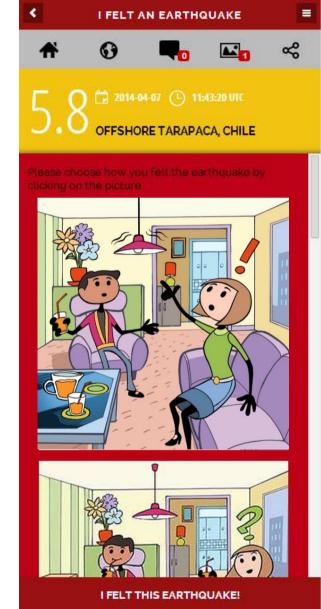

- Near me
  - All quakes around me
- Significant
  - All felt, tsunamigenic or damaging earthquakes
- All
  - Full list of recorded earthquakes
- Notifications:
  - For significant earthquakes only
  - Depends on mag and distance
  - Numbers not to exceed a few tens/yr

# **EXAMPLE AND ADDED AND ADDED A**

I FELT THIS EARTHQUAKE!

- Crowdfunding launched autumn 2013
- Support from Fondation MAIF
- Pool of beta testers identified
- April 2014: under tests at EMSC
- May 2014: Android app to be shared with beta testers
- June 2014: official release (hopefully!)

EMSC Concluding Remarks

- Innovative app to deliver risk information rather than hazard information
  - Focus on the 5% of recorded earthquakes that are felt!
- Targeting general public and authorities
- Aims at optimising collection of eyewitnesses' observations (poster "the key role of eyewitnesses in rapid earthquake impact assessment")
  - Understand public expectations
  - Answer their needs
  - and in turn, further improve the delivered services
