

- The Osservatorio Vesuviano (OV) is the INGV-OV realized a temporary exhibition Naples branch of the Istituto Nazionale di aimed to build communication bridges Geofisica e Vulcanologia (INGV), the between scientific community and people as italian public research institution operating in Geophysics and Volcanology.
- OV is mainly responsible for the monitoring of Neapolitan active Volcanoes, as Vesuvius, Campi Flegrei and Ischia. It cooperates in the surveillance of **Stromboli.**
- The Osservatorio Vesuviano is involved in outreach activities, science education projects, museum activities.

- participant member of the 29th Edition of the outreach event "Futuro Remoto 2015".
- The event, a festival of art, culture, science and technology, took place on October 15th - 19th 2015, in the historical city center of Naples, Italy.
- It was organized by "Città della Scienza" the science museum of the city of Naples.
- The total number of visitors was more than 150.000 people. The staff was 2000 people.

 It was a free and open access event, animated by **400** public and private institutions. Sharing their scientific expertise with the people, in the "Earth dome" the INGV-OV Popularizing science — earth science researchers have shown, through interactive and especially natural hazard — allows labs, how progresses in technology and the knowledge to be efficiently spread in research develope and allow a better society, not confined to an elite, with understanding of dynamic processes and of deep implications for the social role of the geological evolution of our planet.

European Geosciences Union General Assembly 2016 Vienna, Austria, April 18 – 22, 2016

FUTURO REMOTO 2015: researchers meet people

Maddalena De Lucia, Alessandro Fedele, Roberta Esposito, Vincenzo Torello, Rosella Nave, Nicola Alessio, Germana Gaudiosi, Rosa Nappi, Pasquale Belviso, Antonio Carandente, Walter De Cesare, Fabio Sansivero, Valeria Siniscalchi, Sven Borgstrom, Girolamo Milano, Giovanni Pasquale Ricciardi, Giuseppe De Natale, and the Futuro Remoto 2015 Administrative Team

IN VIAGGIO...ATTRAVERSO LE FRONTIERE

researchers.

Practical activities, dialogues and interaction with INGV-OV researchers allowed youth and adults, teachers and students, experts or just curious people, to deepen burning issues in an area exposed to high seismic and volcanic risk, as Campania region.

Osservatorio Vesuviano.

Session: EOS5 ECS

concerned the **current** Vesuvio,

We warmly thank the journalist and photoreporter Credit: Giuseppe Farace Giuseppe Farace and the staff of Città della Scienza, especially Luigi Amodio, Flora De Martino, Francesco De Matteis e Alessandra Drioli.
