

What do we know about how the terrestrial multicellular soil fauna reacts to microplastic?

by Frederick Büks¹, Loes van Schaik² and Martin Kaupenjohann¹

¹ Chair of Soil Science, Dept. of Ecology, Technische Universität Berlin

² Chair of Ecohydrology & Landscape Evaluation, Dept. of Ecology, Technische Universität Berlin

But...

many of these studies did not take into account the

quantification of the adversely effective size spectrum within the applied plastic.

types, sizes, shapes and the grade of weathering representative for different soil environments.

vs.

Long-term effects

Alas! Was that good for my stomach?
