

Circular views of the water cycle

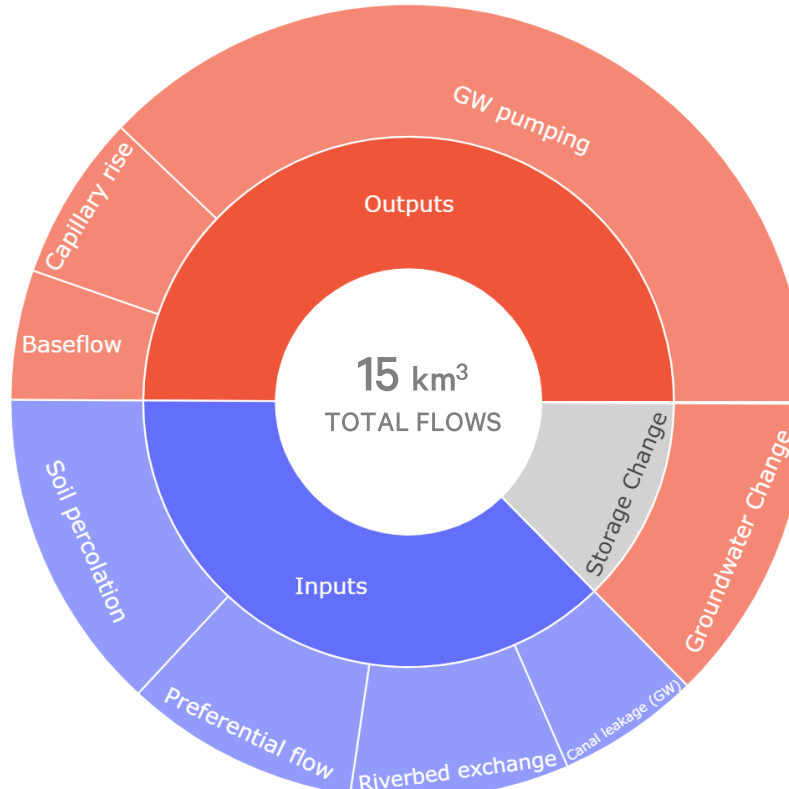

Water circles show the total water flows through a certain space, time, and system.
The sum of the flows around the circle is printed inside the circle (TOTAL FLOWS).

Soil moisture flows

Groundwater (GW) flows

Have a go...

- For groundwater, are there more inputs or outputs?
- Is there an increase or decrease in groundwater storage?
- About how much rain is there?
- How do groundwater inputs and groundwater pumping compare?
- How do groundwater inputs and transpiration compare?
