

Collection, harmonizing and sharing data on European Raw Materials

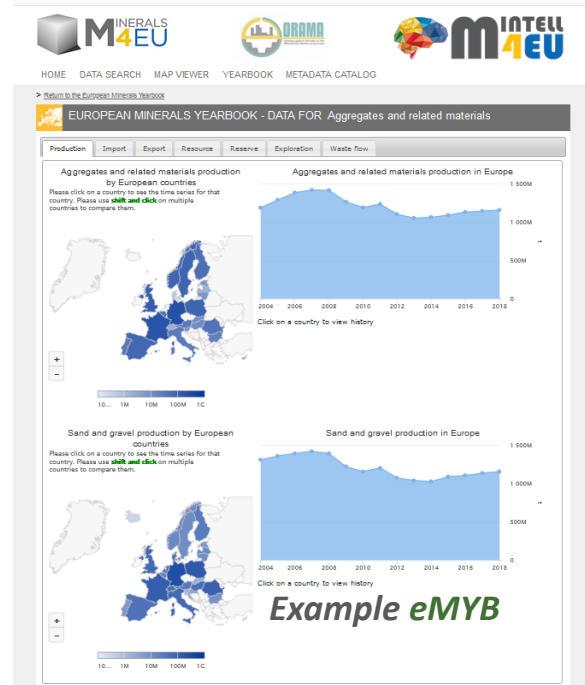

Lisbeth FLINDT JØRGENSEN (GEUS), Špela KUMELJ (GeoZS), Kari A AASLY (NGU), Teresa BROWN & Eimear DEADY (BGS)

AMBITION:

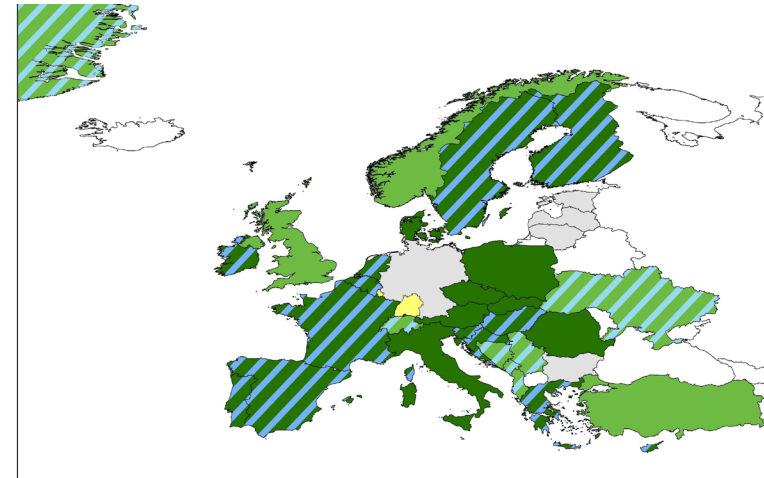

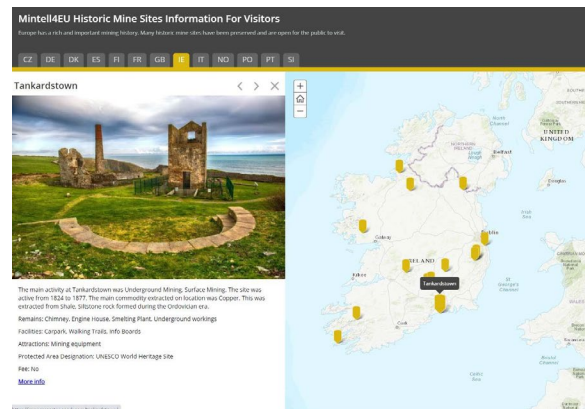

To provide **easy web access** to **useful** and **reliable** mineral intelligence for **all of Europe** by:

- Updating the electronic **Minerals Yearbook – eMYB** (national aggregated data on production, trade, resources, reserves)
- Extending the **data coverage and harmonization** on mines, mineral occurrences (**Minerals Inventory**)
- Collecting information on **Historic Mine Sites**
- Performing case studies to **test UNFC** on raw materials [EGU21-15566](#);
- Making **data available** though a common database (**MIN4EU**), **visible** at **EGDI** and **share** data with other platforms.

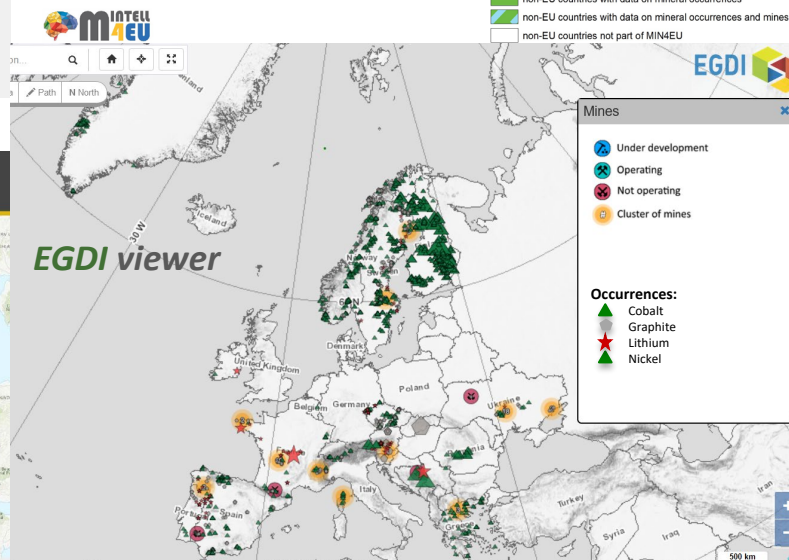

All data will be made available at the European Geological Data Infrastructure (EGDI): www.europe-geology.eu

Historic Mine Sites

Minerals inventory spatial coverage

Mineral Intelligence for Europe

MINTELL4EU builds on previous projects as Minerals4EU, ProSUM, EURare, ORAMA, RESEERVE etc.

SGA News March 2021

ACKNOWLEDGEMENTS

GeoERA is a joint effort by more than 30 European Geological Survey Organizations that contributed directly. Special thanks to all the numerous colleagues of the GeoERA Raw Materials Team and the GIP-P Team in particular
