INTERNATIONAL
ASSOCIATION for
PROMOTING
GEOETHICS

The IAPG: Mission, Status, Organization

A multidisciplinary platform for widening the discussion and creating awareness about values and problems of ethics applied to the geosciences.

- **Founded in 2012 (34th IGC, Brisbane, Australia)**
- **Scientific, non-governmental, non-political organization**
- **Legally registered as NGO**
- **More than 2660 members in 130 countries on 5 continents**

Organization

IAPG Head Office, c/o INGV, Rome, Italy

IAPG works for developing theoretical and practical activities covering a wide range of contents:

- philosophy of geosciences and history of geosciences thinking
- research integrity, professionalism in geosciences, working climate issues and related aspects
- geoethics in georisks and disaster risk reduction
- responsible georesource management
- ethical and social aspects in geo-education and geoscience communication
- geoethics applied to different geoscience fields including economic geology, paleontology, forensic geology, and medical geology
- ethical and societal relevance of geoheritage and geodiversity
- sociological aspects in geosciences and geoscience-society-policy interface
- geosciences for sustainable and responsible development
- geoethical implications in global and local changes of socio-ecological systems
- ethics in geoengineering
- ethical issues in climate change and ocean science studies
- ethical implications in geoscience data life cycle and big data
- ethical and social matters in the international geoscience cooperation
