

The role of knowledge networks in facilitating the creation of climate information services

Larosa, Francesca and Bruno-Soares Marta

DEFINE

KNs are informal groups of policy-makers, scientists, gov. agencies and NGOs that are in continuous contact to share and disseminate climate service

ASSESS

The purpose, process and audience of KNs spread globally, but working at different levels. Semi-structured interviews with 16 KNs.

DERIVE

Different aims: capacity building for low-income countries and funding & network opportunities for EU and US. Still targeting mainly public sector. No shared understanding of what «effectiveness» is.
