A4alerts: Crisis app for emergency communication

Implemented in Catalonia, Spain

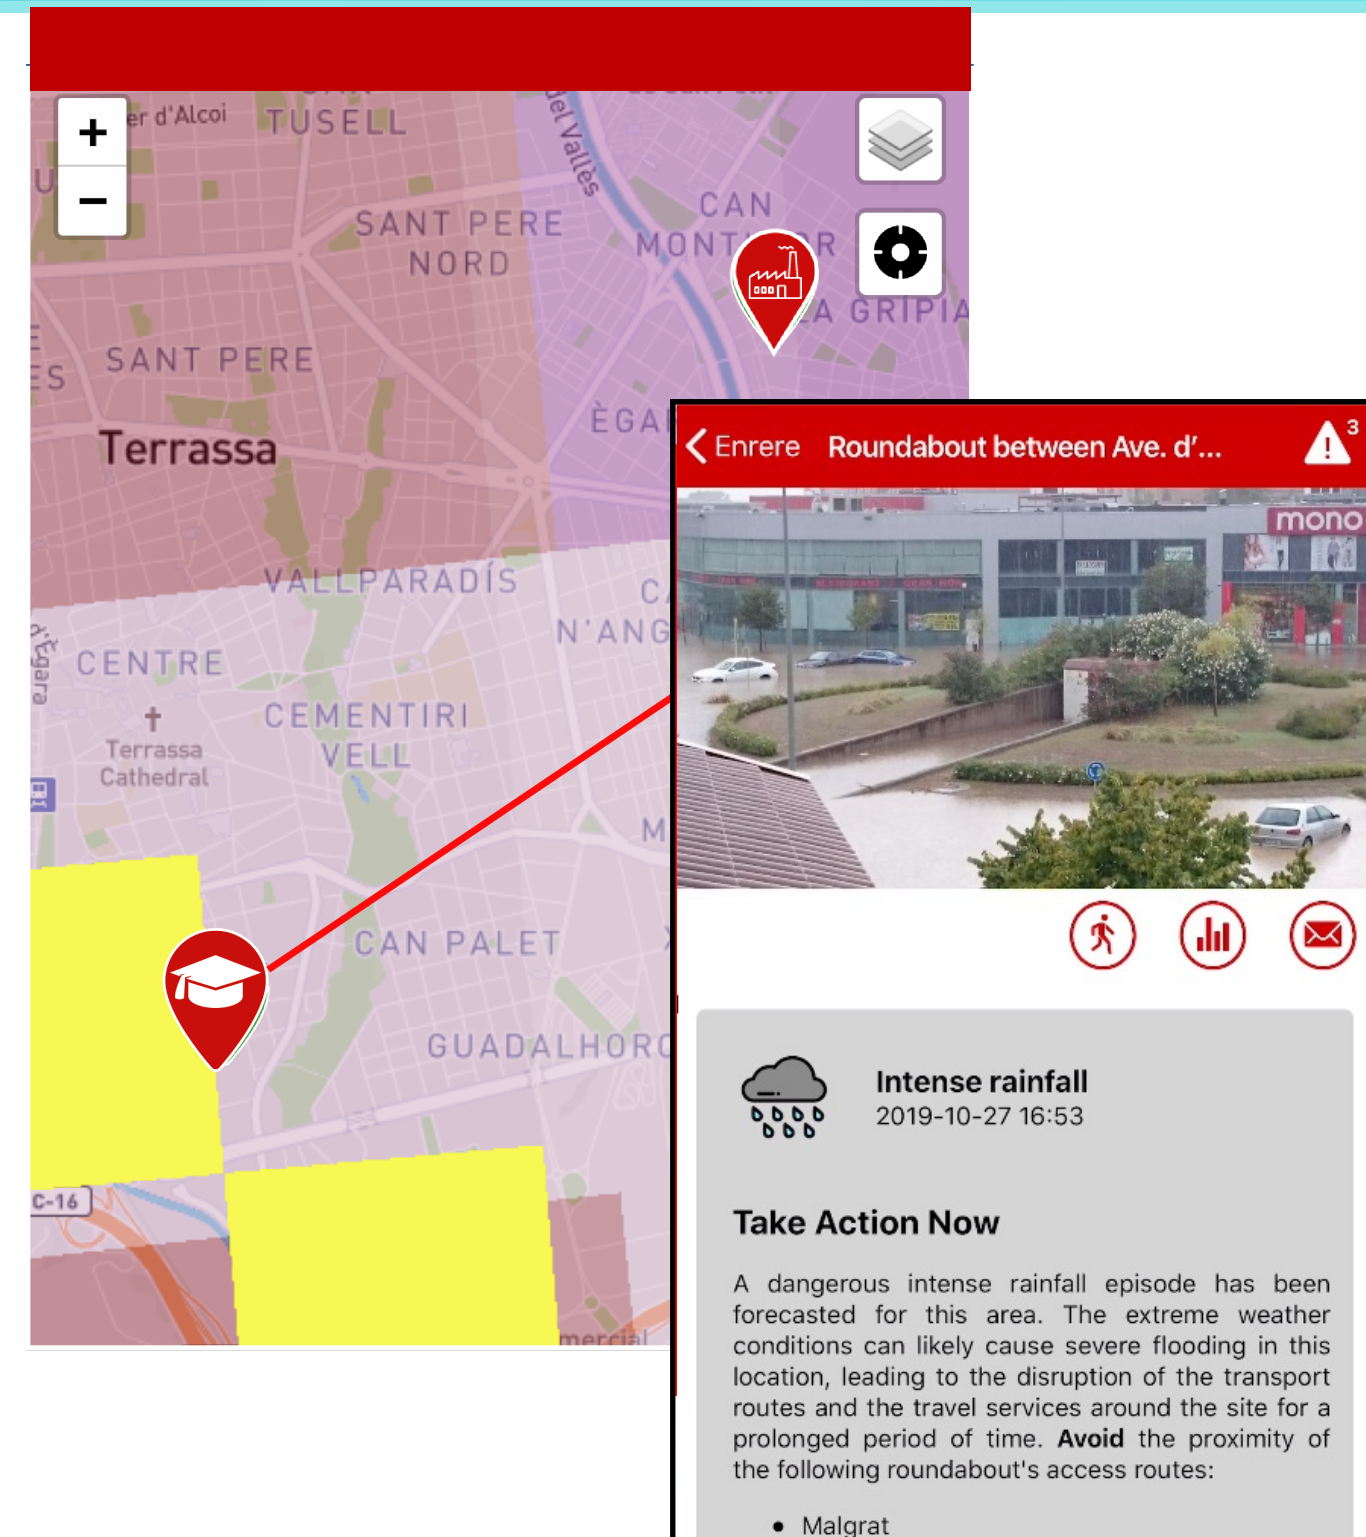

- **Tailor-based communication** during emergencies for communities
- **Official and site-specific warning levels** based on local vulnerability and exposure information
- End-user's real-time impact validation 
- **Protection actions** specific for each location context
- Rainfall forecasts up to 24 hours (radar nowcasting + NWP)
- Push notifications & warning timeline
- Connection with municipal platforms

Currently in operation!

The A4alerts: Design and evaluation

- ❖ Workshops and interviews with community representatives (e.g civil protection)
 - To co-design and gather qualitative feedback of mobile app requirements
 - Usability guidelines and good practices for mobile apps
- ❖ Online experimental survey (n=76) in Terrassa
 - Make protective decisions using the a4alerts app during a real-based flood scenario (1)
 - **Participants:** First and second responders in Terrassa and public/private sectors
 - **Evaluate functionalities and system:**
 - Based on 5-point interval Likert scale statements (2)
 - Ranking from the most to the least useful during emergencies (3)

*Site-specific warning
in Terrassa*

2 App & functionalities evaluation criteria

Impact area	Criteria	Sub-criteria	Statement
Social impact	Effects on emergency decisions, working routines and daiy decisions	Usefulness	<ul style="list-style-type: none">• The app can be useful during emergencies• The app can be usefull for first and second responders
		User's satisfaction	<ul style="list-style-type: none">• I would use and/or recommend this app
	Effects on knowledge sharing	Knowledge sharing	<ul style="list-style-type: none">• I would be willing to send photos of local impacts through the app
Technological impact	Understandability	Functional appropriatness	<ul style="list-style-type: none">• The functionalities are well integrated to support my protection actions
	Learnability	Self-explanatory interface	<ul style="list-style-type: none">• The functionalities are easy to understand• The app could be used without previous training• The interfase is intuitive
	Attractivenes	Interfase aesthetics	<ul style="list-style-type: none">• The interfase has an aesthetically pleasing apperance

The A4alerts: Evaluation results (n=76)

2

Technological Impact

The app could help first and second responders

I would be willing to send photos of local impacts through the app

The functionalities are well integrated to support my protection actions

The interface has an aesthetically pleasing appearance

The interface is intuitive

The functionalities are easy to understand

The app could be used without previous training

The app could be useful during emergencies

If available, I would use this app in case of emergencies

if available, i would recommend this app to a friend or familiy

Social Impact

Strongly disagree Disagree Neutral Agree Strongly Agree
