

THE DEEP NETWORK

Curating and co-producing quality ocean-education
information for adults

What is the Deep Network?

Brings together marine researchers and adult educators to find what is important to know about the human impact on the ocean, and suggest ways to educate adult learners so that they tend towards behavioural change.

Who can join?

YOU! Researchers, ocean activists, industries, adult educators, etc... Anyone interested in disseminating transparent and accessible information, and looking for collaborations across disciplines.

Inspiring Practices

To move from "knowing" to "doing" the deep Network will introduce INSPIRING PRACTICES action points – what realistic changes or actions can an individual start making today?

Hub Meetings

An opportunity for you to share your expertise, learn and connect with others about how to make your information more accessible to educate adult learners.
