EOSC Future

A European Dashboard showcasing the State of the Environment

A. Vermeulen, A. Adamaki, D. Schaap, P. Thijssse, T. Krijger, R. Bardaji, A. Fornos, I. Rodero, Environmental Research Infrastructures (ENVRIs)

What is the Environmental Dashboard?

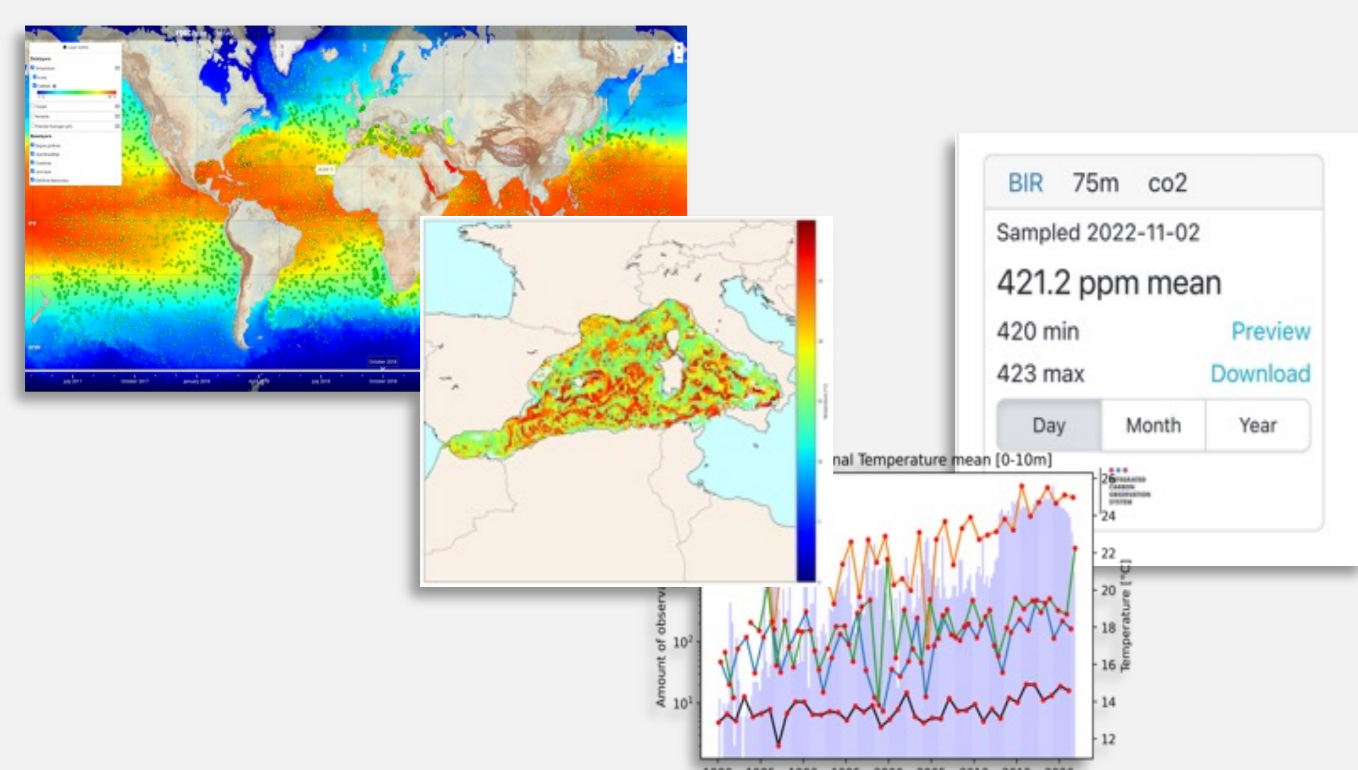

It is an **EOSC Service** that is being developed by Research Infrastructures in the Environmental cluster (**ENVRIs**).

In a nutshell, the Dashboard:

- Provides information on the state of the environment (for public, policy makers)
- Offers a switchboard to applications to explore data and models (for scientists)
- Helps us understand the impacts of a changing climate on biodiversity, environment and societies
- Contributes to the improved understanding of our universe

Investigate the State of the Environment with the ENVRI indicators!

An extensible collection of **Environmental Indicators** resulting from good quality data and FAIR services provided by the **ENVRIs** allow the users visualize the **State of the Environment** on an interactive interface.

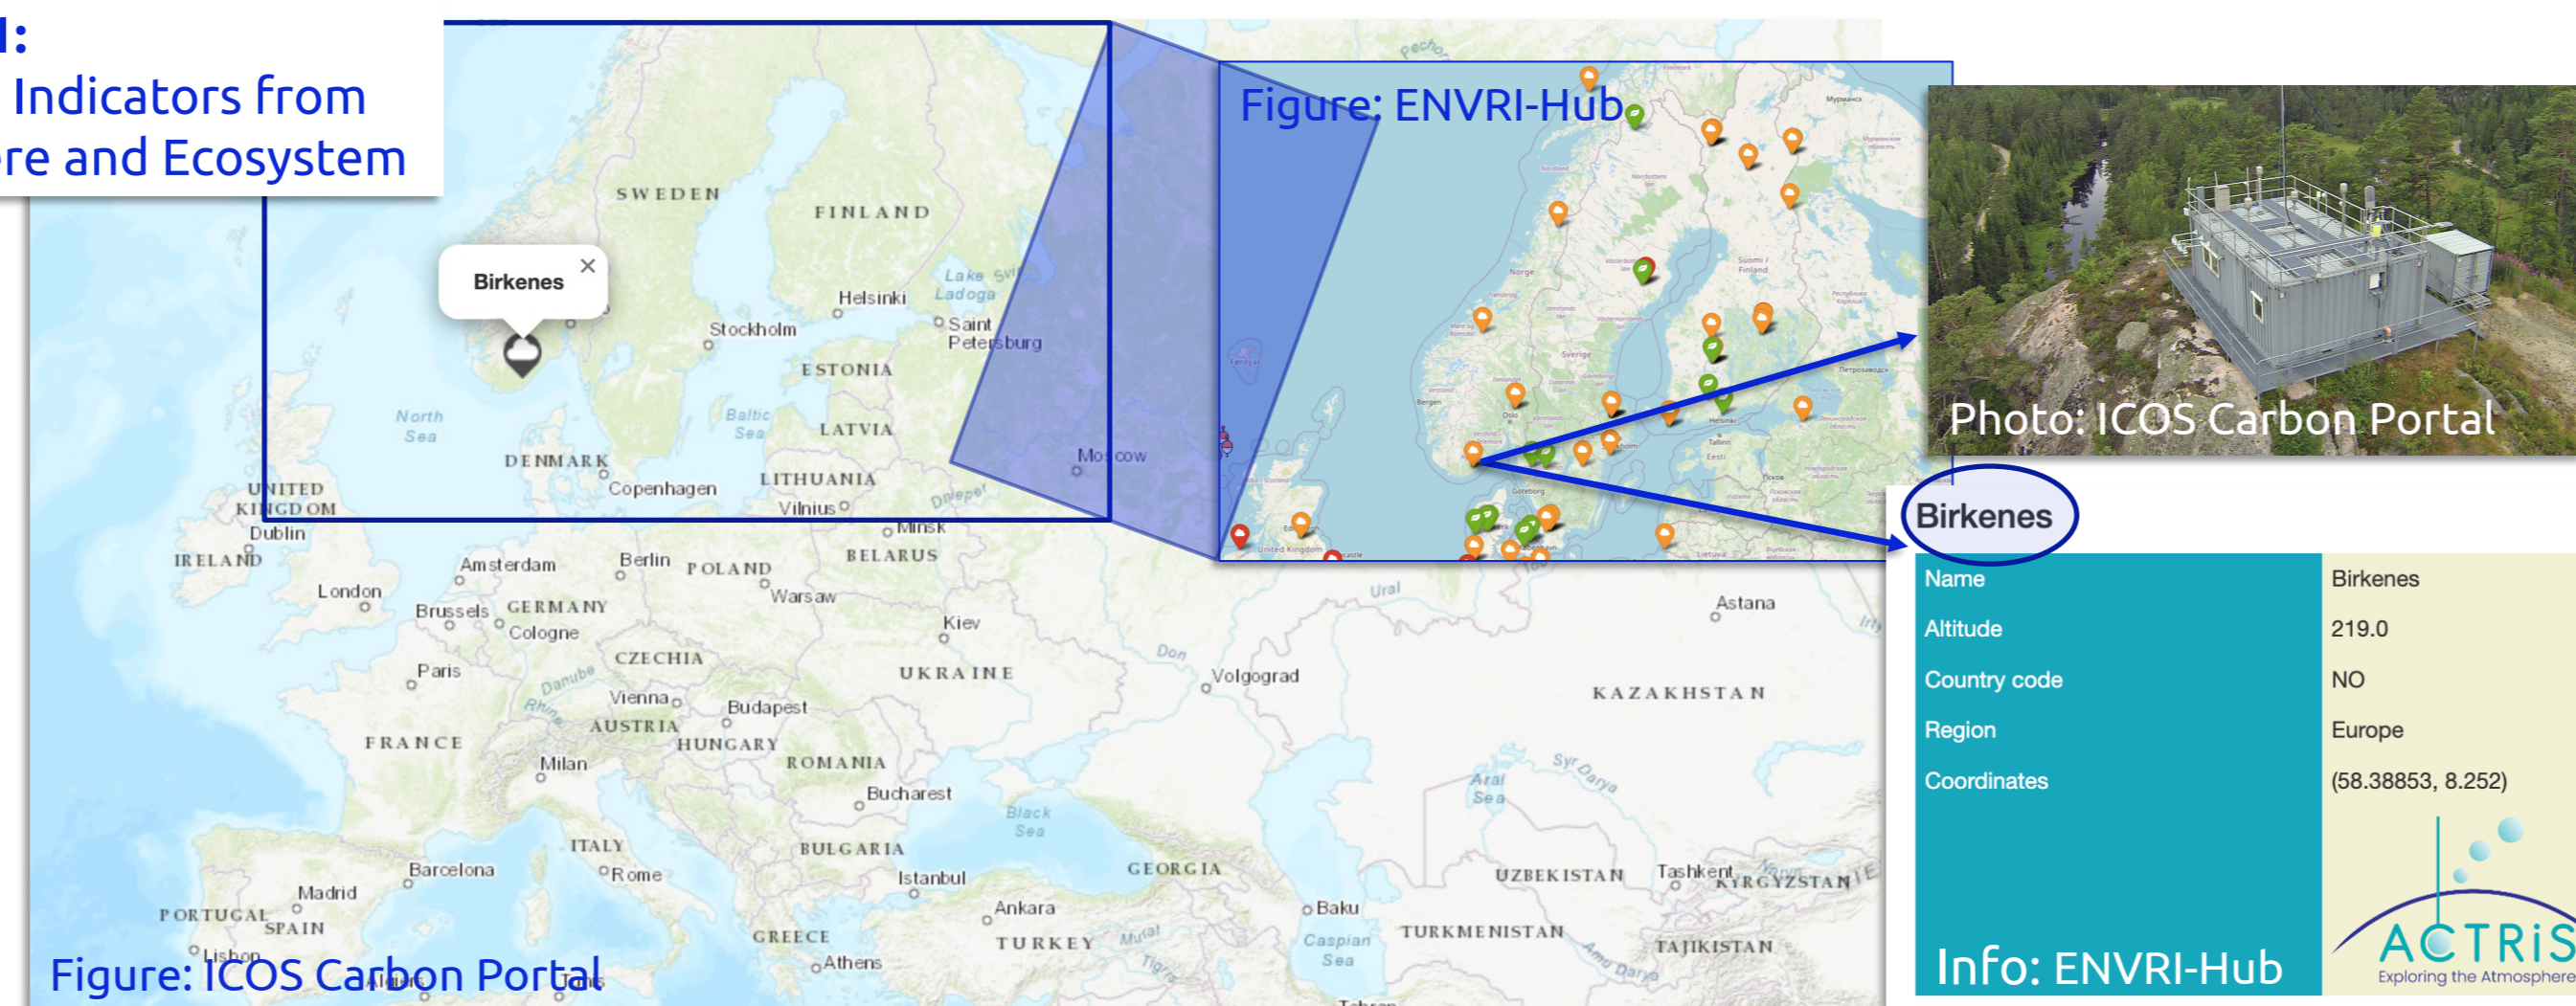

The Dashboard is universal and flexible. Each user can configure their own Dashboard, **customise the view and choose the indicators of their interest** by logging in with their EOSC credentials or creating their own Dashboard account! <https://env-dashboard.eoscfuture.eu/>

EOSC as enabler – Service Integration

Several **EOSC services** are used to develop the Dashboard on the **EOSC Platform** and support the RI providers.

- EOSC Marketplace
- EOSC AAI Federation
- EGI Cloud Compute
- EOSC Service Monitoring
- EOSC Helpdesk
- Achieved
- In Progress

Visit the EOSC and find out more about the ENVRI Dashboard!

An interactive environment that gives clear and easy access to the ENVRIs.

Climate change is a scientific fact and Science means knowledge, awareness and understanding!
