

Soil fertility change outweighs climate change impact on maize yield in sub-Saharan Africa

April 19, 2024

Conference - EGU General Assembly 2024 Vienna

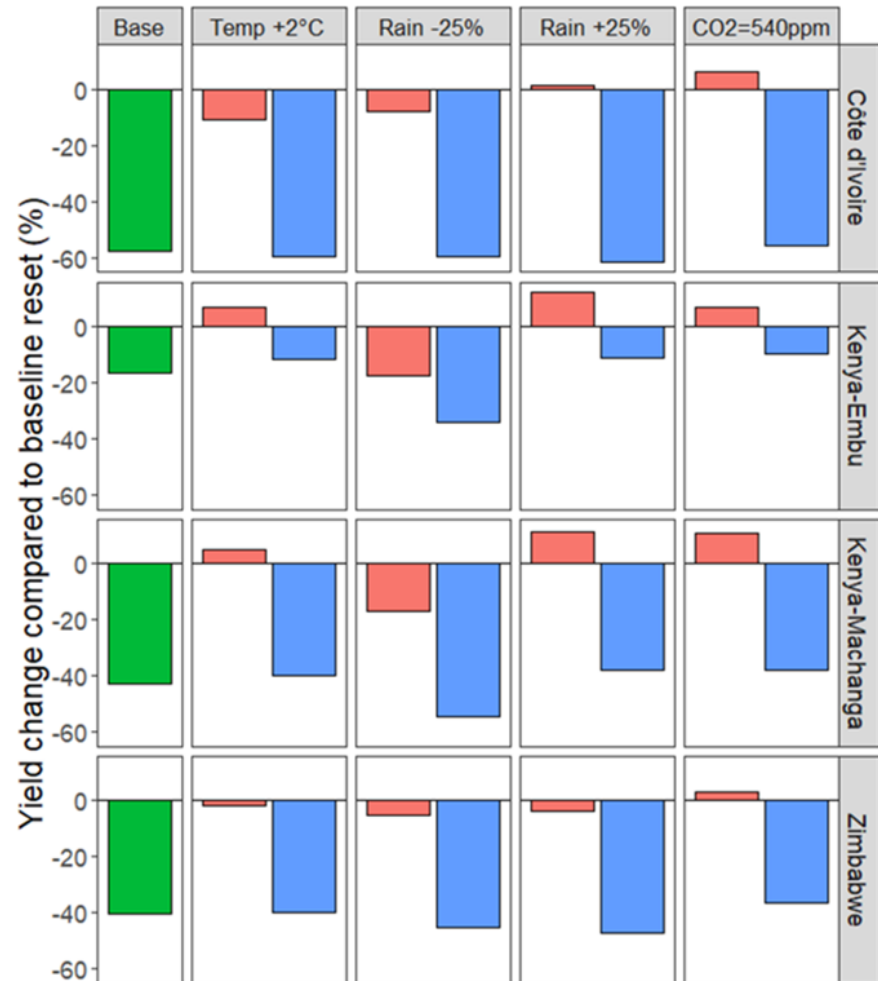

Antoine Couëdel, Gatien N. Falconnier, Myriam Adam, Rémi Cardinael, Ken Boote, Eric Justes, Alex, C. Ruane, Ward N. Smith, Anthony M. Whitbread, François Affholder, Juraj Balkovic, Bruno Basso, Arti Bhatia, Bidisha Chakrabarti, Regis Chikowo, Mathias Christina, Babacar Faye, Fabien Ferchaud, Christian Folberth, Folorunso M. Akinseye, Thomas Gaiser, Marcelo Galdos, Sebastian Gayler, Aram Gorooei, Brian Grant, Hervé Guibert, Gerrit Hoogenboom, Bahareh Kamali, Fidel Maureira, Fasil Mequanint, Laub Moritz, Claas Nendel, Cheryl H. Porter, Dominique Ripoche, Leonard Rusinamhodzi, Shikha Sharma, Upendra Singh, Johan Six, Amit Srivastava, Bernard Vanlauwe, Antoine Versini, Murilo Vianna, Heidi Webber, Tobias Weber, Zhang Congmu, Marc Corbeels

Impact of climate change and soil fertility on crop yield in no input systems

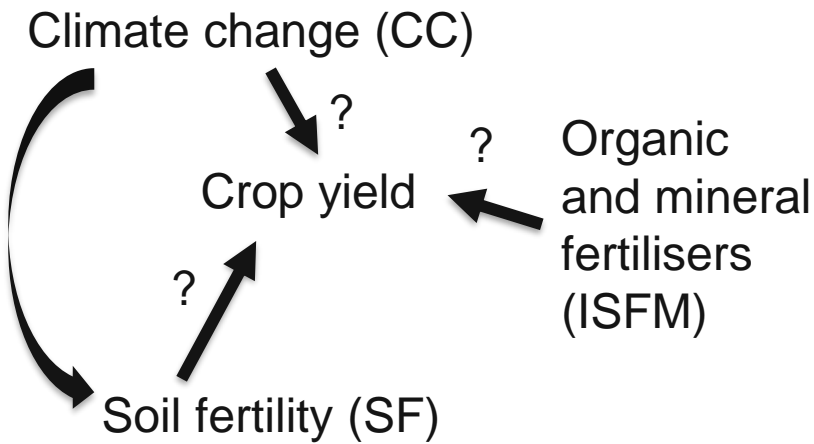

Processes

- 1- CC only
- 2- SF only
- 3- CC and SF combined

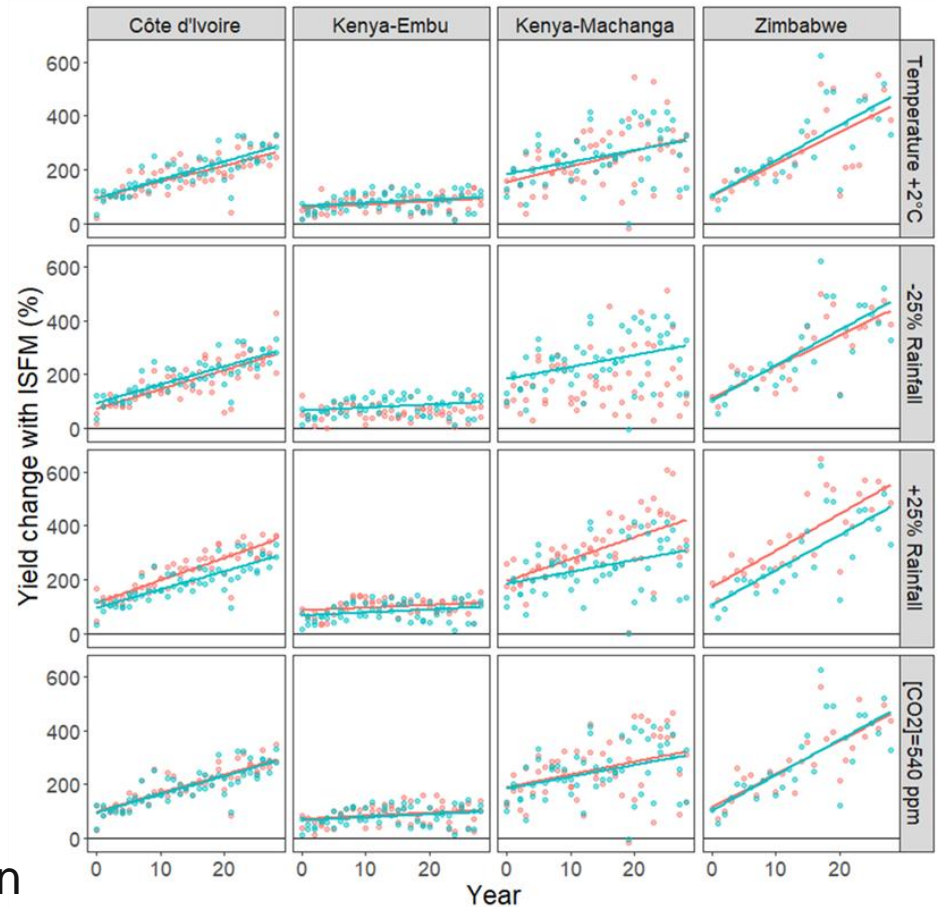

→ Soil crop long term feedback have to be taken into account

Impact of climate change and soil fertility on crop yield with organic and mineral fertilisers (ISFM)

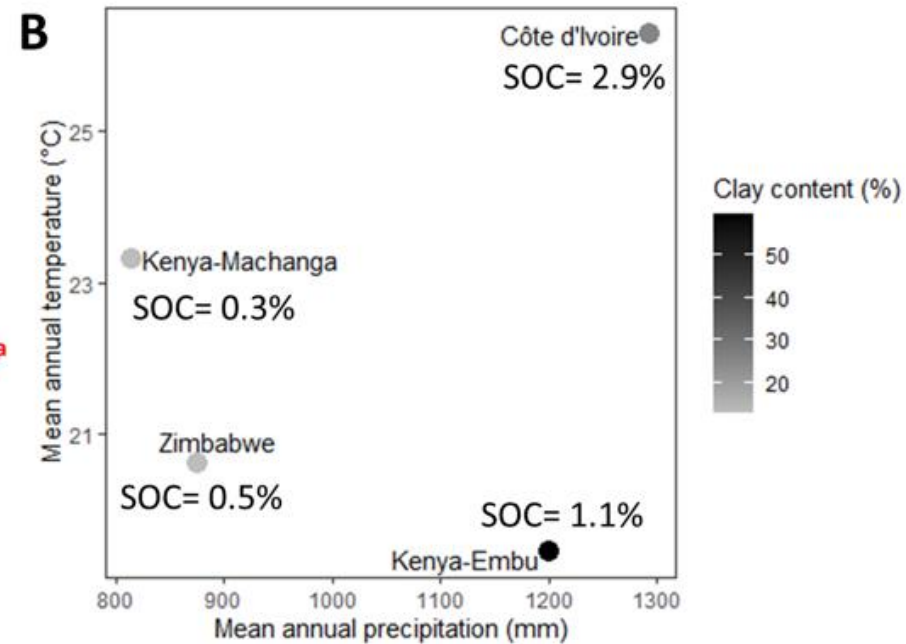

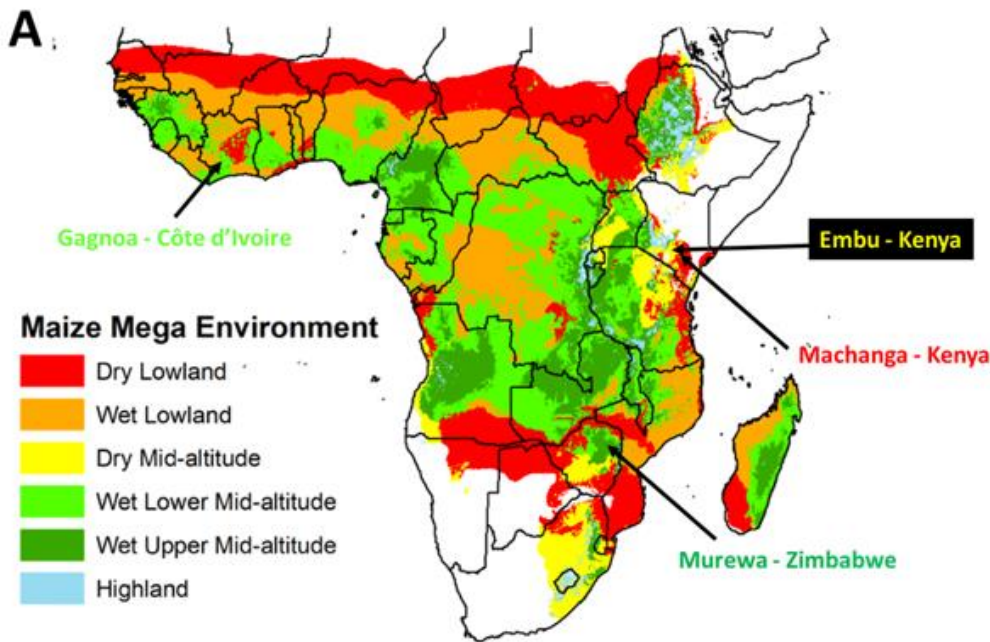

Processes

→ ISFM as a non regret CC adaptation

→ Take home message: urgent need to account for soil-crop long-term feedback
