# Content

Why strengthening weather services

What is Yr, DPG?

Weather forecast in Africa as DPG?

Who and how

What do we want to achieve?

Success factors

# Why strengthening Weather Services?

FN

WMO

Norway

MET

# The Global Risks Landscape 2018

What is the impact and likelihood of global risks?

# Capacity building projects

Vietnam  
Bangladesh  
Sri Lanka  
Myanmar  
Mozambique

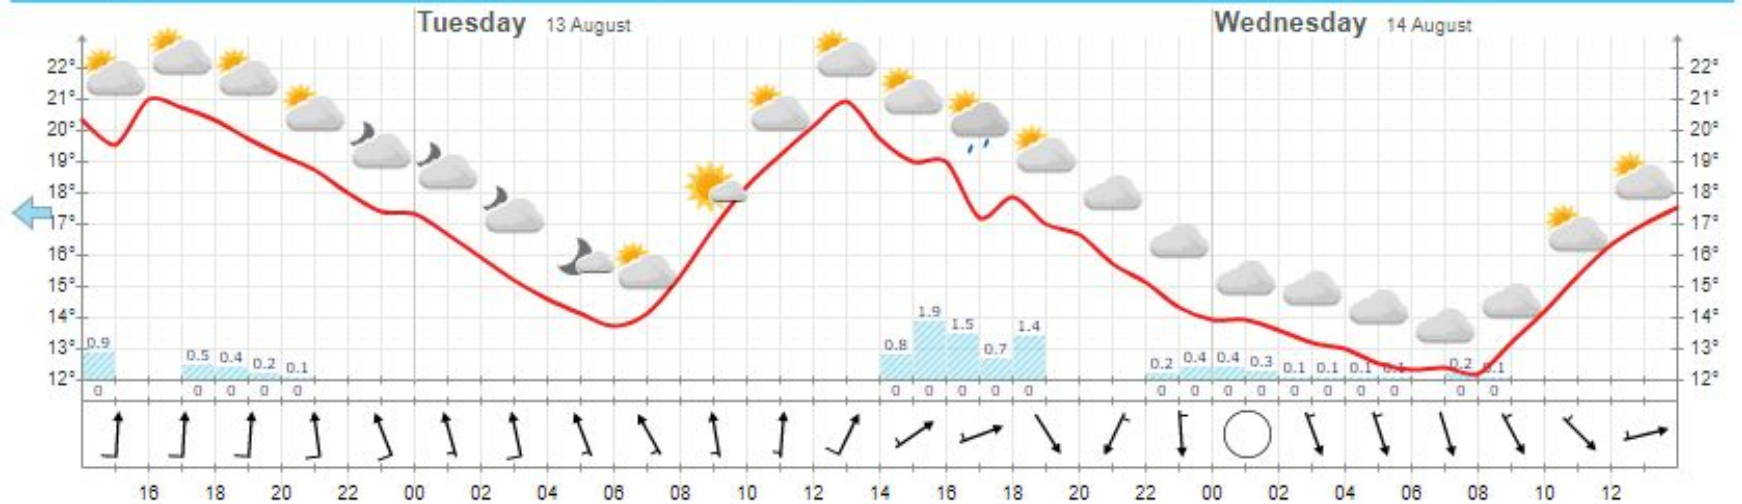

- in-house developed tools
- open source
- in daily use at MET
- hands on training
- weather and climate

# Yr

## Meteogram, next 48 hours

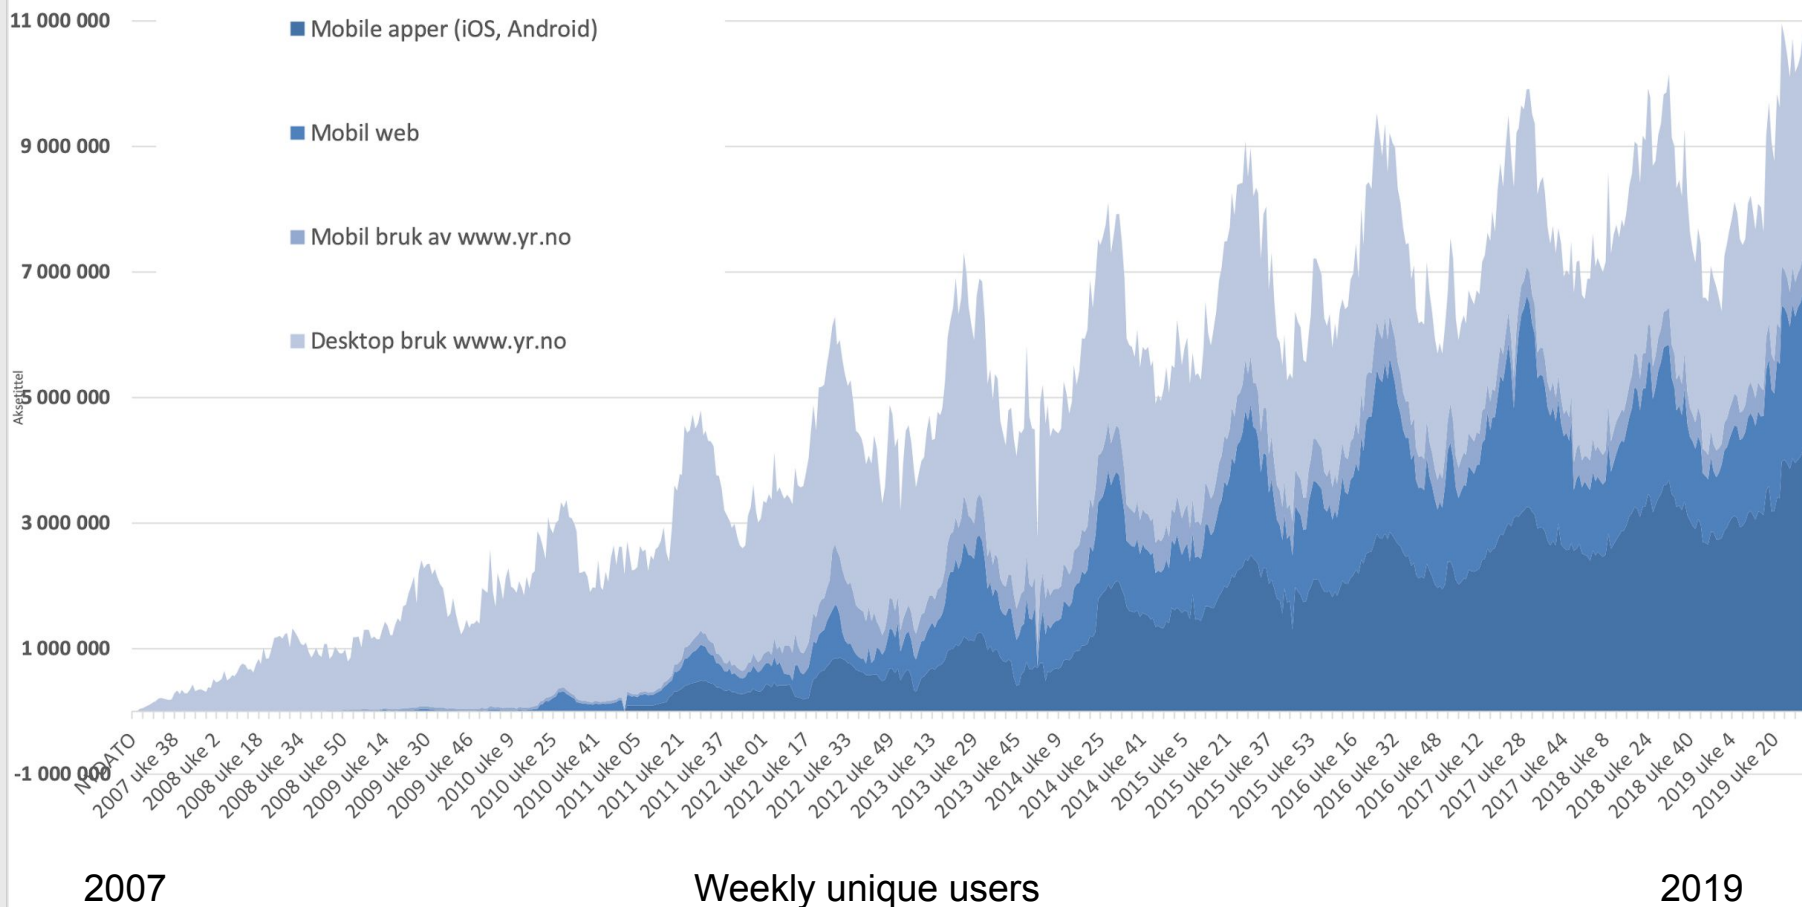

user centric

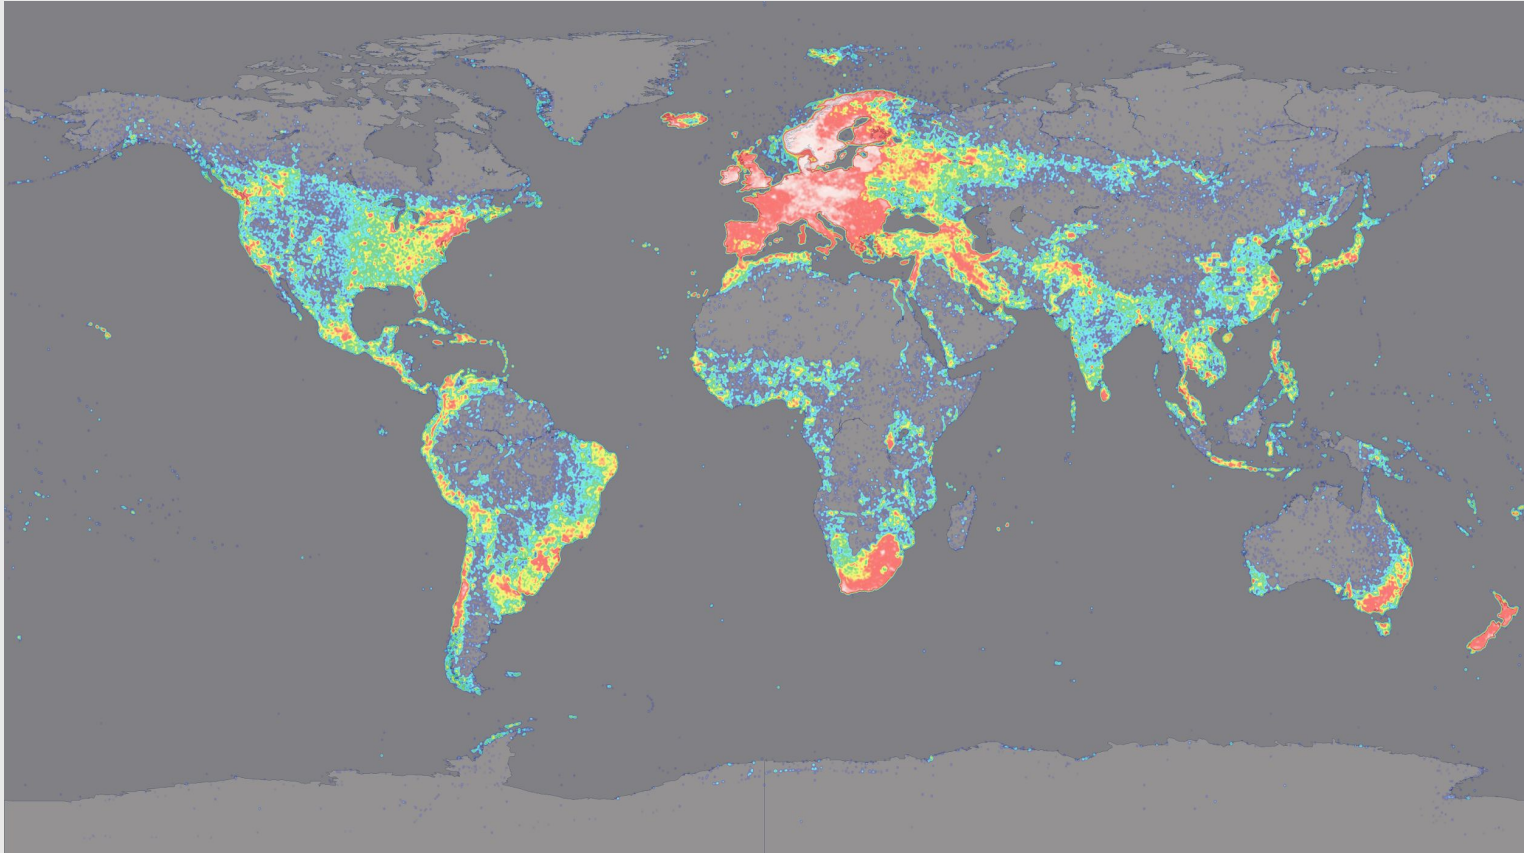

not complete before received  
understood by end user  
meets needs in decision process

# Use of Yr worldwide

# Use of Yr worldwide

*“The scale, spread and speed of change made possible by digital technologies is unprecedented, but the current means and levels of international cooperation are unequal to the challenge.”*

**António Guterres**, UN Secretary-General

UNICEF and the government of Norway are creating a collaborative process designed to facilitate the development, discovery, scalability, and use of digital public goods by anyone in the world at little or no cost.

Many DPG's serve to support the [UN's 2030 Sustainable Development Goals](#).

Examples: Wikipedia, Moodle, Global Digital Library, DHIS and MET Norway Weather (Yr)

# Who are we?

**TMA**

**MMD**

**WMO**

**MET Norway**

**NORAD**

**NORCE**

# Project description

establish relationships

gain user insight

share MET Norway experience

learn about use and need for  
weather information

plan for future part of project

Photo by Annie Spratt on Unsplash

establish api.met.no for use as DPG

dedicated access for NMHS's

expand with standardized  
metadata and user doc

prototype for seasonal weather  
forecasts

# Goal

Develop MET Norway weather as a digital public good for the delivery of user-centric weather forecasts locally in Africa

Building useful weather services

To help accelerate achievement of the UN's sustainable development goals (SDGs).

Help institutions, private companies and individuals in the partner countries leapfrog and reduce unnecessary duplication of efforts.

# success factors

**SUFFICIENT HUMAN  
AND ECONOMICAL  
RESOURCES**

**COMMUNICATION  
SKILLS**

**BUILD GOOD, LASTING  
RELATIONSHIPS**

**ACCESS  
TO IT  
INFRA-  
STRUCTURES**

**DEDICATED  
NHMS's**

# future plans

build local data distribution service

build local frontends (different languages)

facilitate local start-ups

expand WP2 to deliver seasonal forecasts

online user forum

text generators, voice messages

establish and implement useful relationship

between research and operations

use of local observations

# Thank you for your attention
