

Discover Social Science Data

Search for social and economic data across a diverse portfolio of data repositories and metadata services

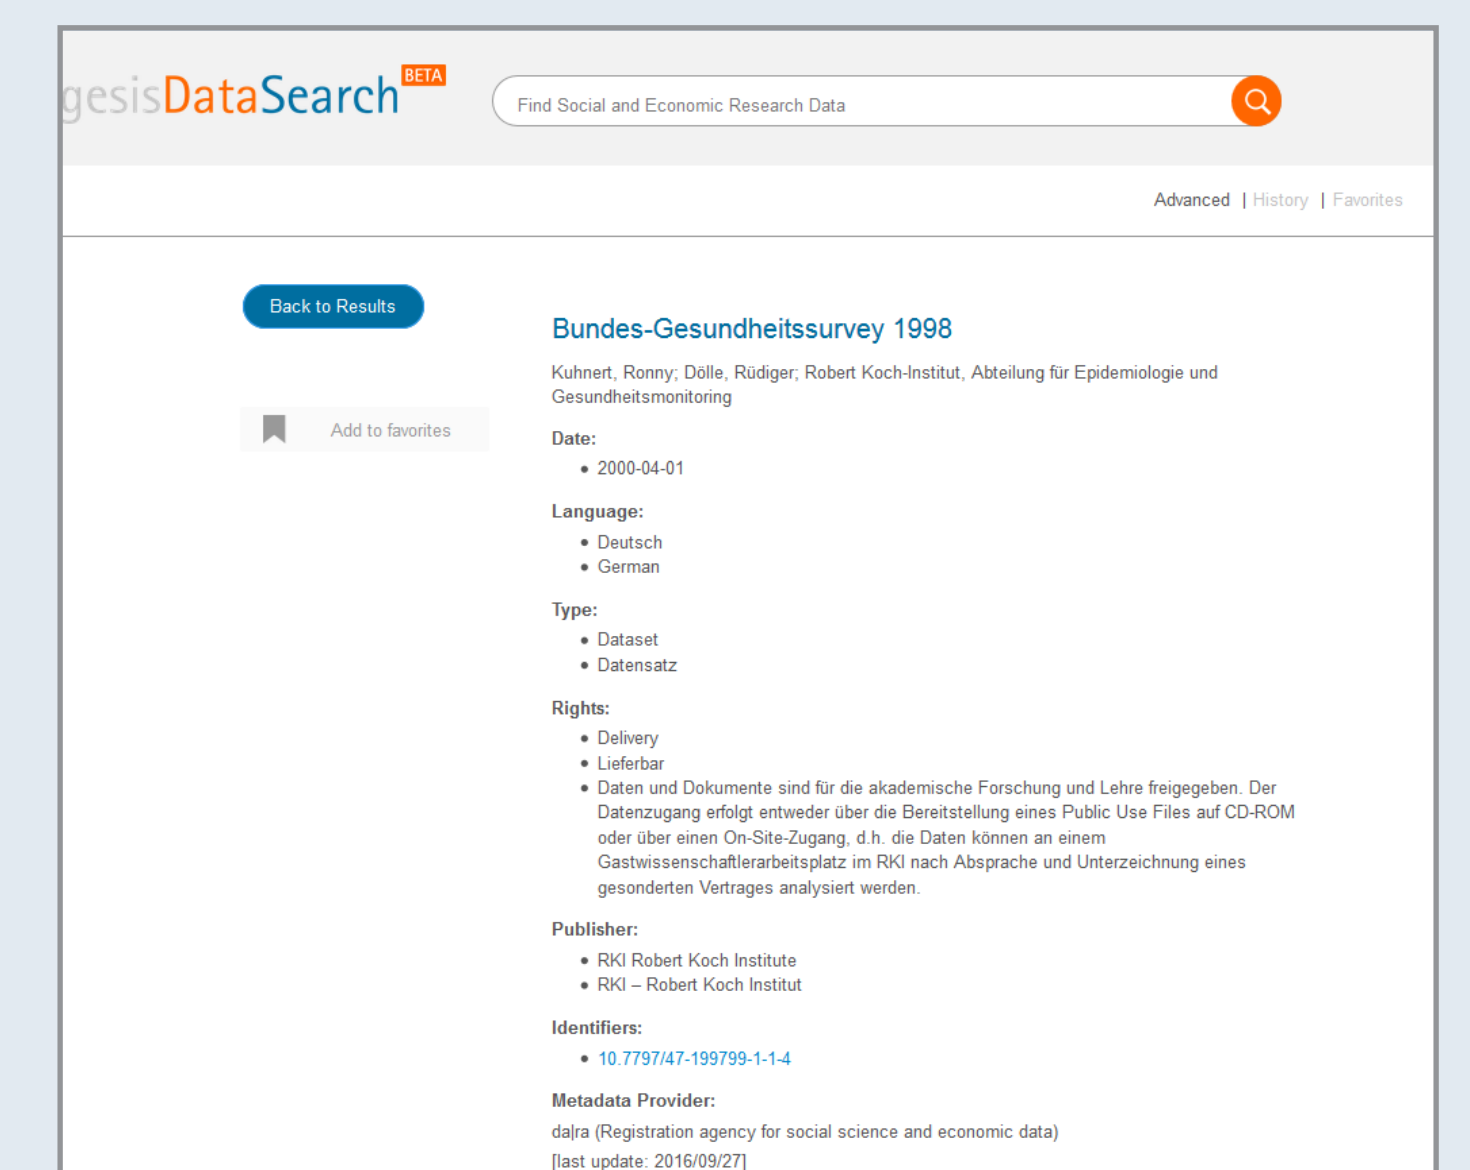

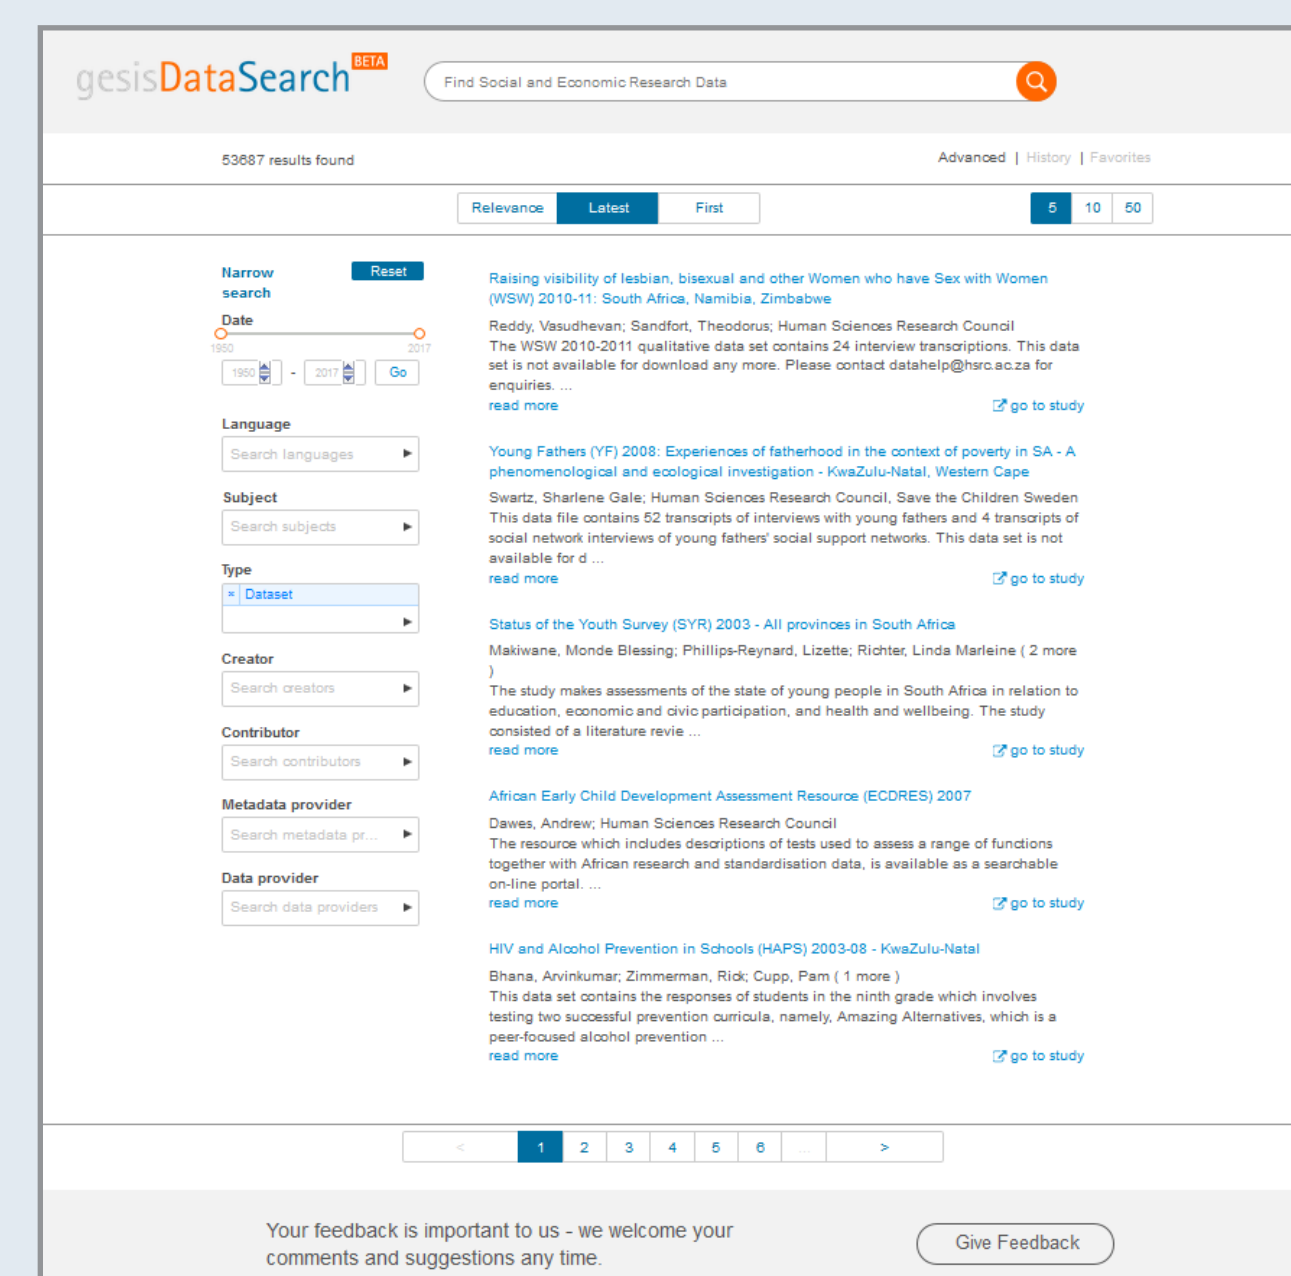

Features:

- find collections of social science data quickly and easily irrespective of their origin
- search and browse using standardized facets
- get quick overviews of available data

go to study

Similar Data

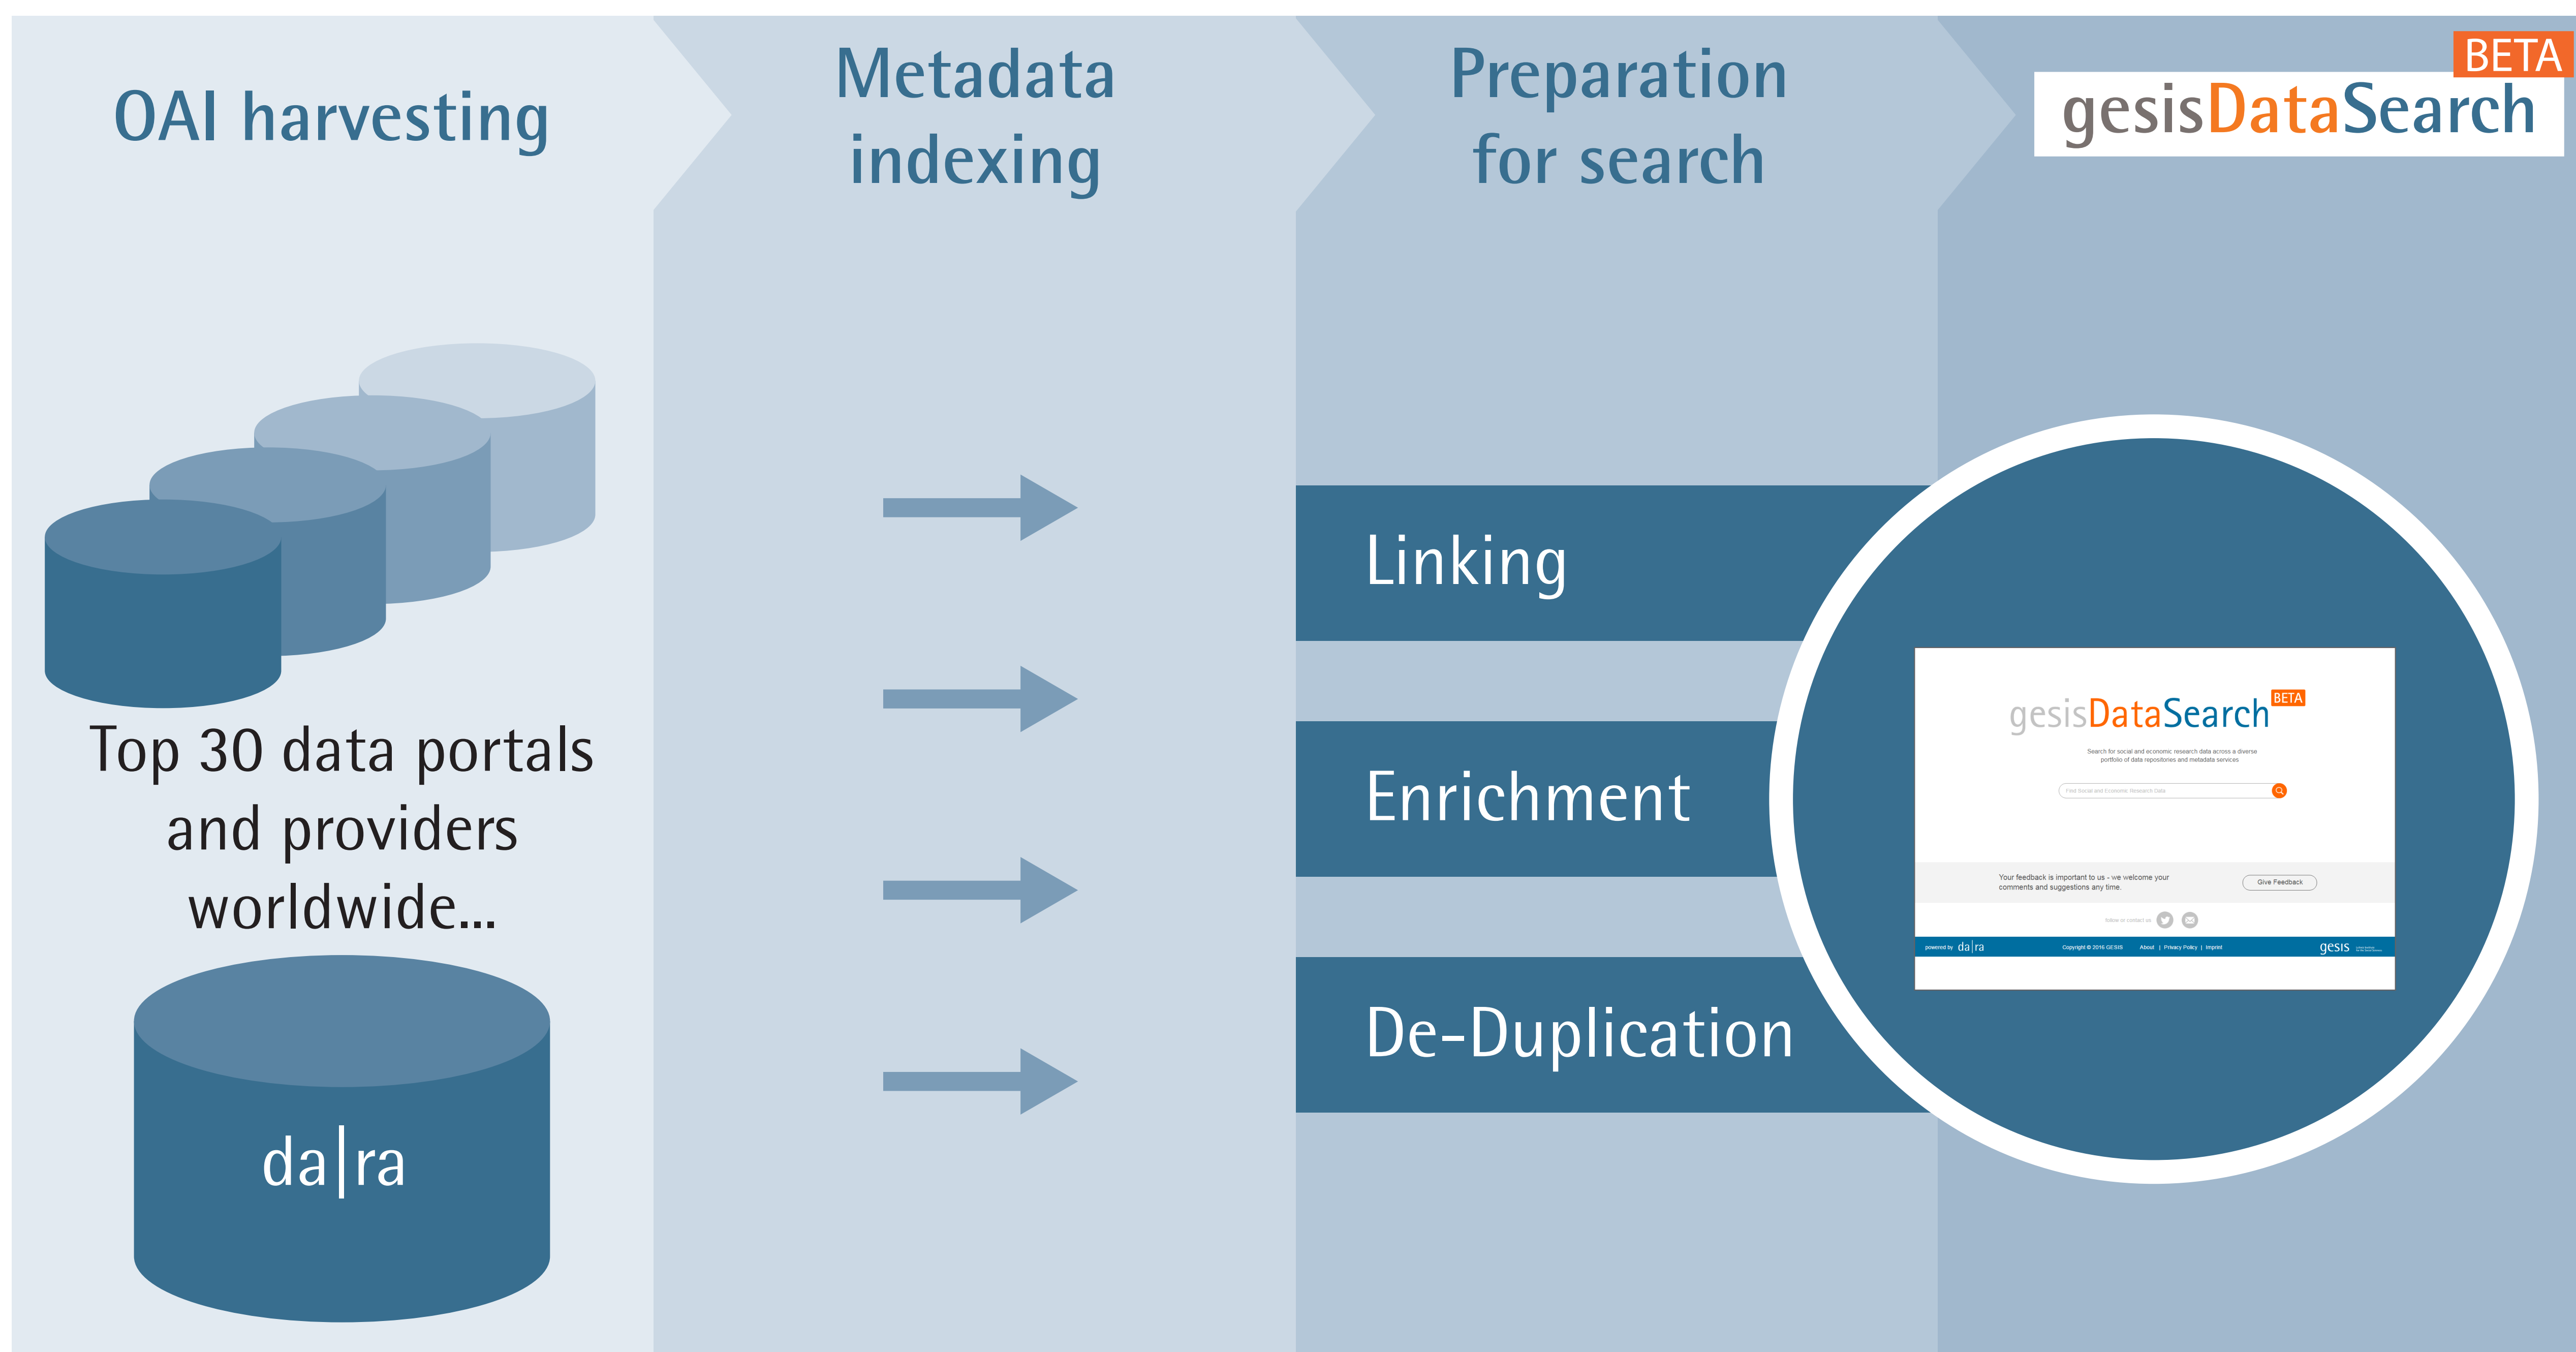

- Follow-up on Finnish European Parliament Elections 2004
- Follow-up on Parliamentary Elections 2007
- Follow-up on Municipal and European Parliamentary Elections 1996

Contents:

gesisDataSearch includes Dublin Core metadata from more than 30 data providers among them the ICPSR and the CESSDA Service Providers GESIS, UKDA, SND, DDA, FSD, CSDA, NSD and LiDA.

Most of the metadata are harvested from metadata aggregators such as da|ra, DataCite and DataVerse. gesisDataSearch is an agency service not only for data providers to gain greater visibility and researchers to find data and manage their data references, but also for other service providers to access data by exposing its structured metadata via OAI-PMH.
